Art Unit: 1618

Claims 21-25 and 27 are presented for examination.

The amendments and remarks filed on have been received and entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 21-25 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yavitz (Ocular Surg. News 17:28, supp. Sept 1999) and Woodward (U.S. Patent 5,877,211).

Yavitz teaches the use of the claimed compound, brimonidine having neuroprotective effect during ophthalmic surgery. See the entire article. Woodward teaches the neuroprotective effect of prostaglandins in ophthalmic field. See the abstract and claims. The primary reference differs from the claimed invention in the presence of a prostaglandin. It would have been obvious to a person skilled in the art to add a prostaglandin to the composition of Yavitz, considering that Woodward teaches the neuroprotective effect of prostaglandin compounds.

One skilled in the art would have been motivated to combine the teachings of the above reference, since one relates to the use of the claimed alpha-adrenergic agent having neuroprotective activity in the ophthalmic field and the other relates to the use prostaglandins having neuroprotective effect in the ophthalmic field. It is generally prima facie obvious to combine two compositions each of which is taught by the prior art to be useful for the same purpose, in order to form a composition which is to be used for

Application/Control Number: 09/903,954

Art Unit: 1618

the very same purpose. The idea of combining them flows logically from their having been used individually in the prior art. As shown by the recited teachings, the instant claims define nothing more than the concomitant use of two components having neuroprotective activity in the ophthalmic field. See In re Kerkhoven, 626 F.2d 848, 205 USPQ 1069 (CCPA 1980).

The newly presented amendments necessitate the new ground of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zohreh A. Fay whose telephone number is (571) 272-0573. The examiner can normally be reached on Monday to Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman Page can be reached on (571) 272-0602. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
